DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sawada et al. US 2003/0030042 or Shah et al. US 2003/0195279.

4. Each of the cited patents teach compositions that can be based upon polyvinyl chloride polymers and copolymers, see Shah et al. at the abstract and Sawada et al. at [0083]. The smoke suppressing agents claimed are shown in Shah et al. at [0007]-[0018] and Sawada et al. at [0070]-[0082]. The aluminum, magnesium and zeolites are further shown in Shah at [0020]-[0026] and Sawada et al. [0087]. Given that each of the claimed components is shown and suggested to be used in combination, one of ordinary skill would be motivated to utilize them as claimed. As such, the claimed invention is prima facie obvious.
